Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
 THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-3, it is noted that the subject matter of the claimed invention, as set forth in the preamble, is the connection structure; however, in the bodies of the claims, the induction line cover instead of the connection structure is being defined. Such inconsistency renders the instant claims indefinite as it is not clear as to what is being claimed.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 (as best understood) are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese reference 6153305.

The Japanese reference shows an induction line cover with a connection structure, having all the features recited in the instant claims, including a cover joining structure, shown in Figure 5 of the Japanese reference, which comprises member 29 and members 31. Note that at least the cover joining member 31 of the Japanese reference is being connected to the induction line cover and has all the features of the cover joining member that is broadly recited in the last paragraph of claim 1.

Art Unit: 3617

Regarding the instant claimed engaging and disengaging lock, recited in claim 2, consider Figure 9 of the Japanese reference; wherein, the protrusion is in the form of lock pin 72 and a recess is in the form of a hole provided on an opposing plate section to receive the lock end of lock pin 72.

Regarding the instant claimed concave groove recited in claim 3, consider the concave groove shown in Figure 9(b) of the Japanese reference.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Applicant should further consider the structures of Sprague, Horn, Mageoch, and Wehr.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mark T. Le whose telephone number is 703-308-3663. The examiner can normally be reached on Mon-Fri (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samuel Morano can be reached on 703-308-0230. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
